

Year 2 - WB 27.2.23

English

In English this week we read the story 'Here come the Aliens!' This book contained loads of descriptions of different aliens, so we decided to create our own aliens to describe. The children included adjectives, similes, adverbs, and conjunctions in their writing.

Maths

In Maths this week we've been measuring length, with a focus on addition. We measured items around the classroom, and the length of each other's arms! Then we added some of our arms together. We practised adding lengths together in the form of word problems.

Phonics

Science

We have begun an enquiry to find the best material to make a spacesuit. The children decided it needs to be flexible, strong, and a thermal insulator. This week we tested strength by placing weights onto the materials until they broke.

Other curriculum subjects

- PSHE - Healthy me
- Music- Harmonies
- RE-Easter story
- PE- Sending and receiving
- Computing- Digital music

Song of the Week

Dates for the Diary
